Experiment -1

AIM: To create an AWS free tier account to provision the resources.

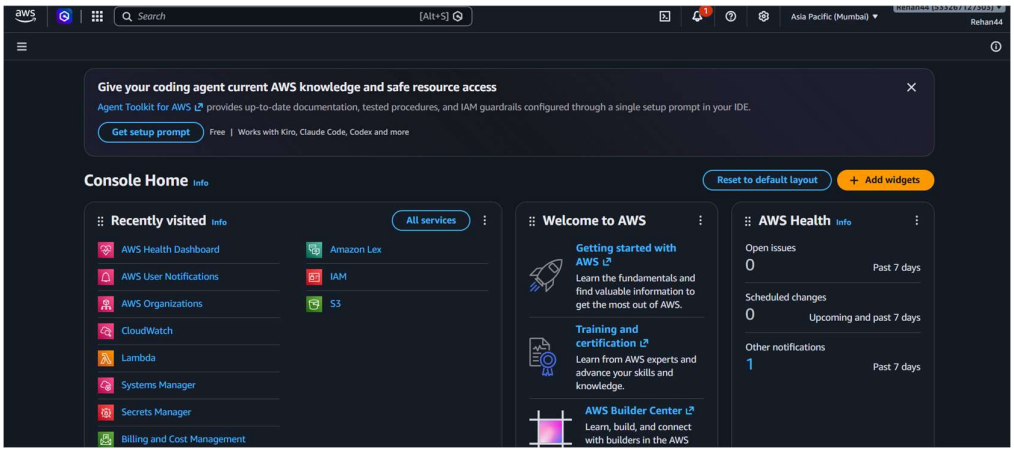

Description:

Created an AWS account based on personal email id and reached the dashboard page of aws console.

Steps:

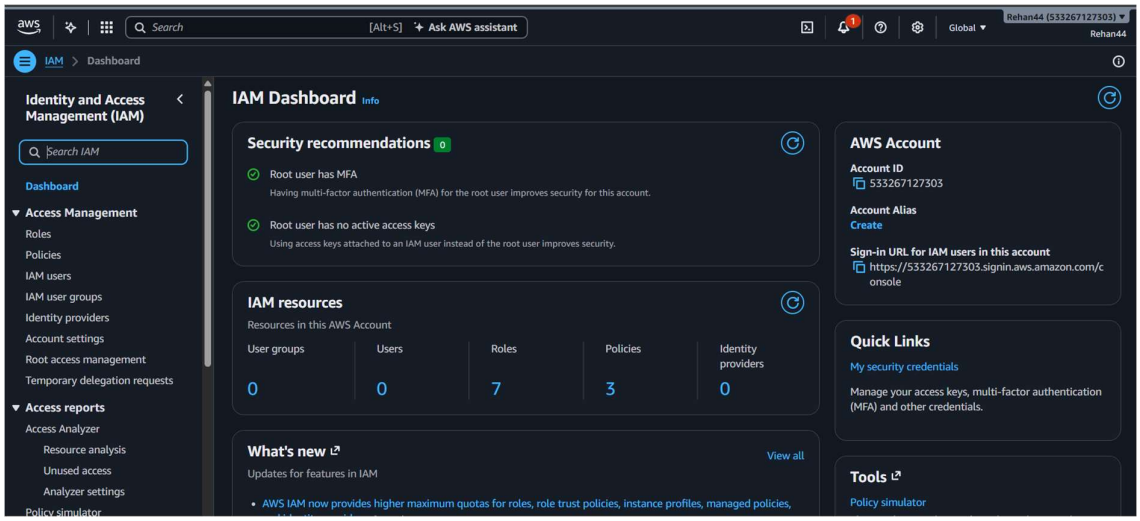

1. Open the official AWS website: AWS Free Tier.
2. Click on Create Free Account.
3. Enter your email address and AWS account name.
4. Verify your email address using the OTP sent by AWS.
5. Create a strong password for your AWS account.
6. Select the Free Account Plan if eligible.
7. Enter your personal details, including name, address, and phone number.
8. Provide the required payment information for verification, if requested.
9. Complete phone number verification using the OTP.
10. Select the Basic Support Plan.
11. Review the details and click Complete Sign Up.
12. Wait for AWS to activate your account.
13. Once activated, open the AWS Management Console.
14. Sign in using your registered email address and password.
15. The AWS account is now ready to provision and manage cloud resources.

Output:

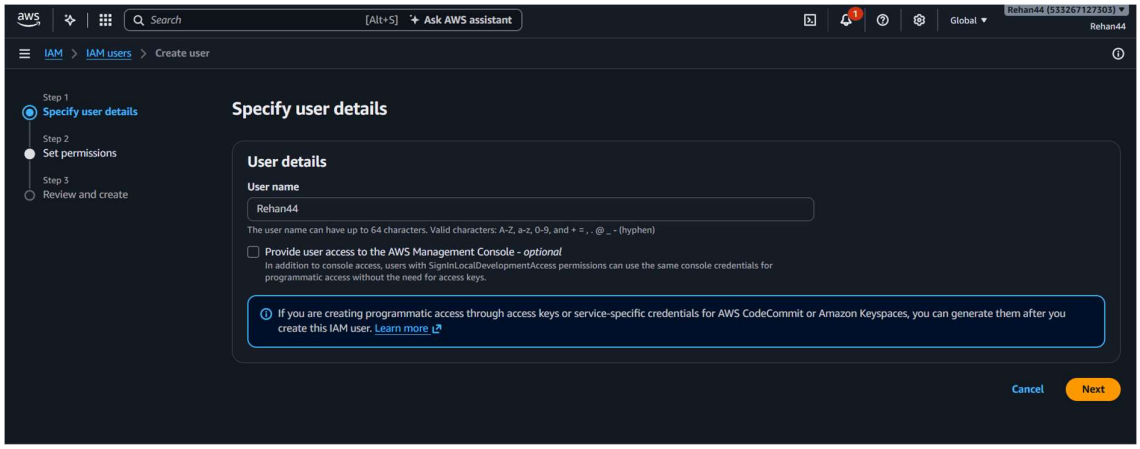

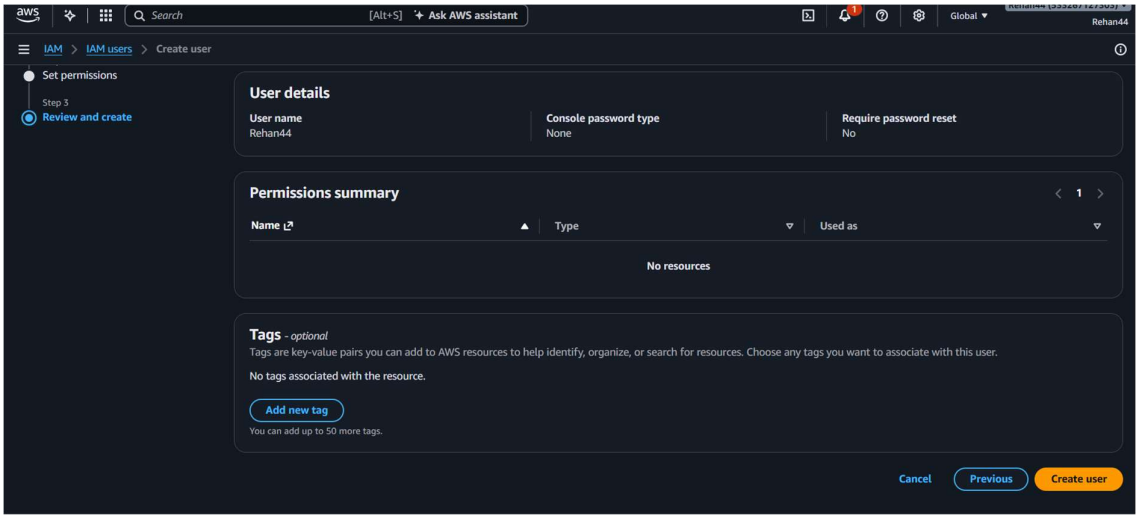

1. Create an IAM user with programmatic access only, download the access key and secret key, and document the steps with screenshots.Then set up a billing alert for the account so that an email is received when the Free Tier limit is about to be crossed.

Accessed the IAM dashboard

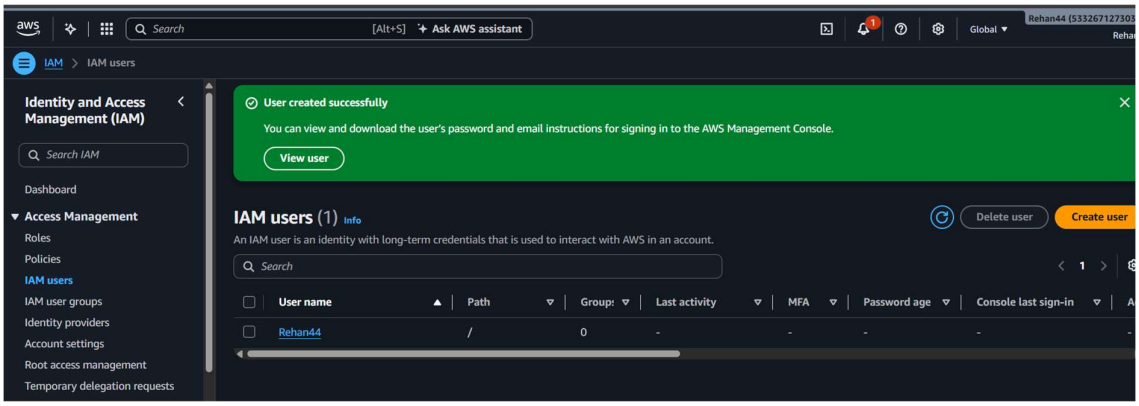

Creating a new user

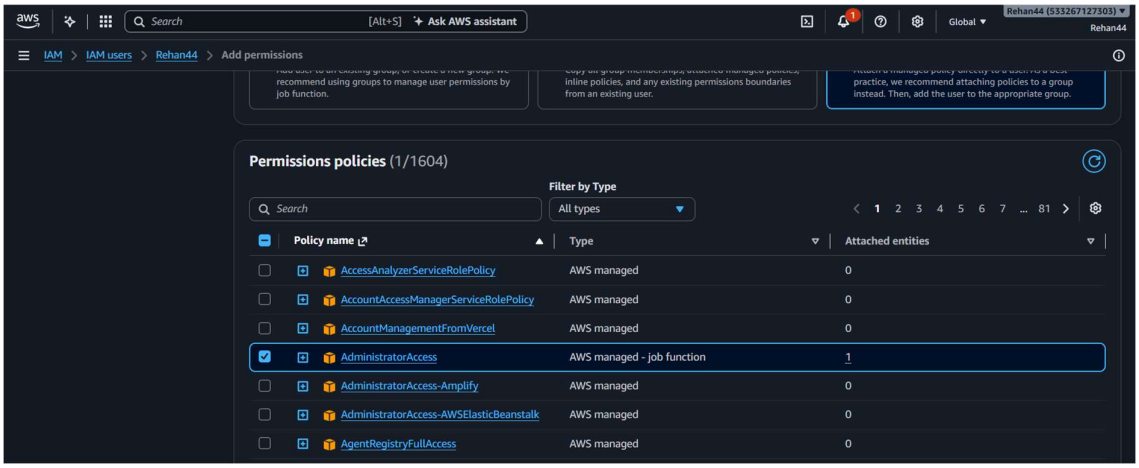

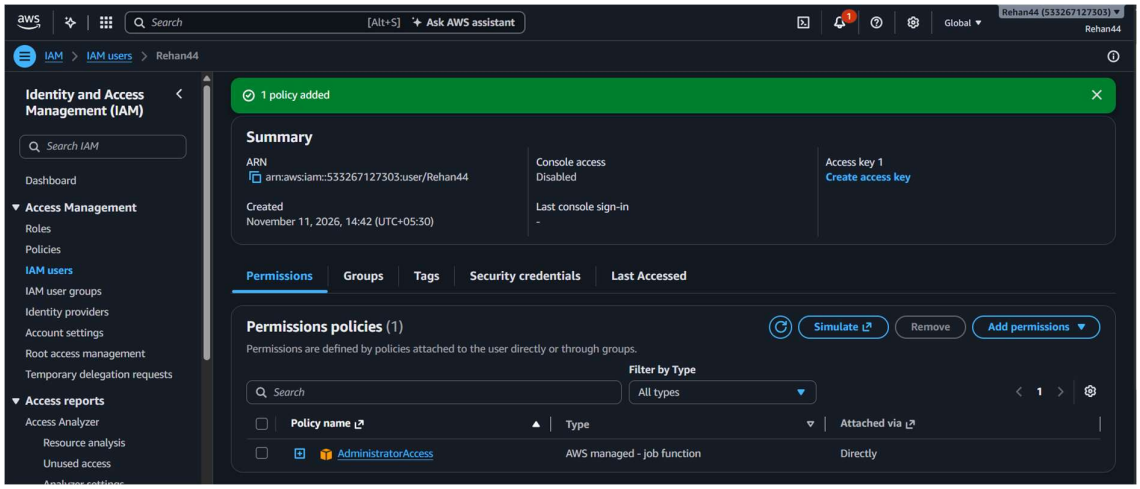

Successfully Created a new user called rehan44

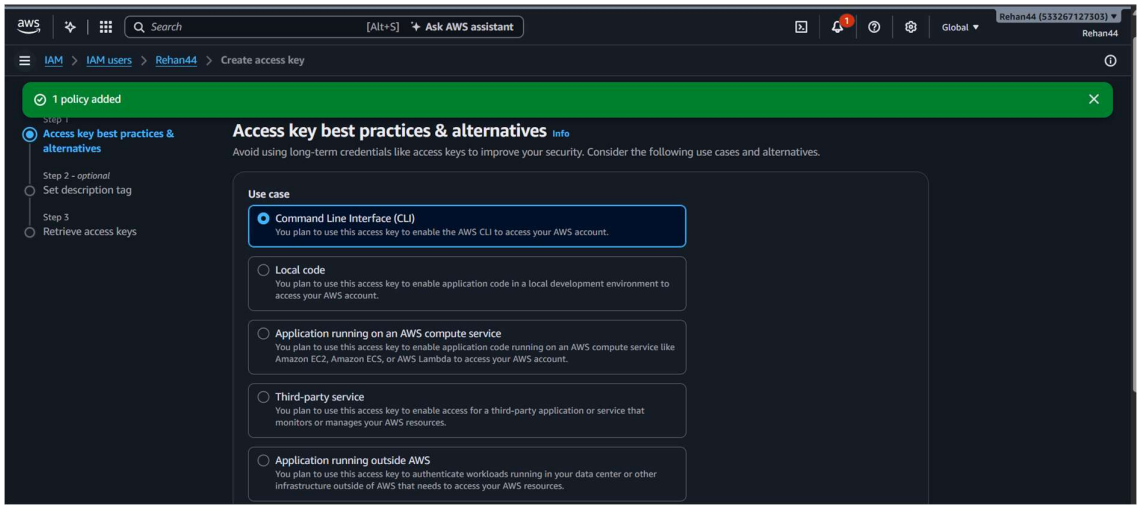

Changed the permissions for the current user

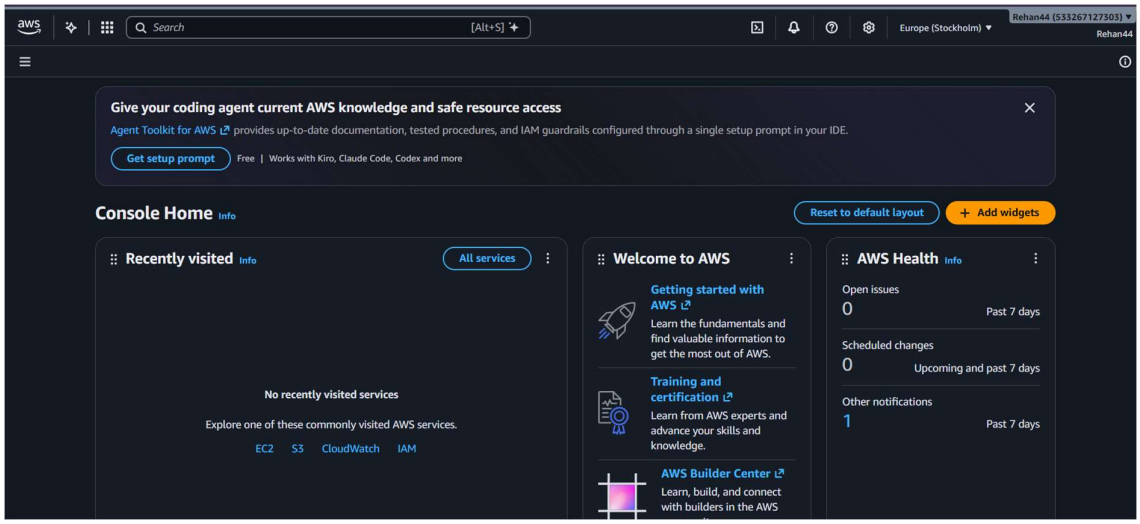

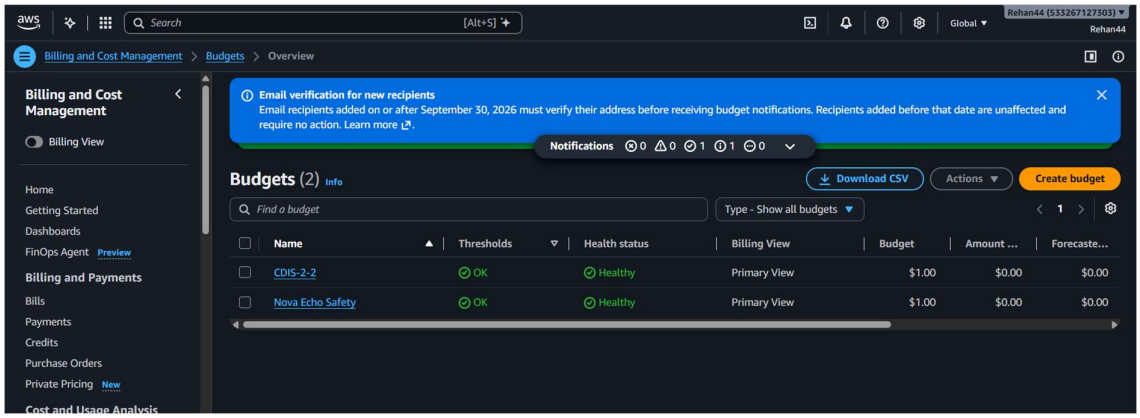

Specified the use case for the user

Logged in the new user in an incognito tab

We have created and logged in as a new IAM user and set the budget for the user

We have set the budget for the root user
